

DOLL AIRPORT EQUIPMENT

PIONEERING EXCELLENCE IN AIRPORT MANAGEMENT SOLUTIONS

RENATO RAMELLA

Managing Director, DOLL Airport Equipment

Effective and secure airport management is essential to guaranteeing smooth operations in the ever-changing aviation industry. DOLL Airport Equipment stands out among the leading companies in this field as a pioneer in offering

state-of-the-art ground support systems. With an emphasis on sustainability, quality, and innovation, DOLL has made a name for itself as a reliable partner for airports all around the world. As a leader in ground support equipment and services, DOLL combines quality craftsmanship with innovative technology to ensure seamless operations for its clients.

Founded in 1998, DOLL Airport Equipment began its journey by delivering its first catering high loaders to Gate Gourmet, a partnership that continues to this day. Over the years, the company has expanded its footprint, now serving 260 airports across 80+ countries, with headquarters in Oppenau, Germany, and a subsidiary in New Jersey, USA.

“What sets DOLL equipments apart is its unwavering commitment to quality and innovation,” these are the words stated by the Dynamic Managing Director of DOLL, Mr. Renato Ramella. The company invests in training its apprentices and collaborates with high-quality suppliers to maintain excellence. Its dedicated development department focuses on creating solutions like the SAS System, OCS System with Display VisionX, and RDS System—each designed to enhance efficiency and safety.

DOLL's product portfolio spans three key categories: catering highloaders, cleaning highloaders, and PRM (Passengers with Reduced Mobility) highloaders, also known as ambulifts. These vehicles are available in various sizes to accommodate different aircraft types, ensuring versatility across airport operations.

Beyond equipment, DOLL offers a suite of support services, including spare parts management, technical support, mobile service, and the DOLL Academy—a training initiative to empower clients with knowledge and expertise. With a global network of 130 partners, DOLL ensures prompt, localized service wherever its clients operate.

As the aviation industry moves toward carbon neutrality, DOLL is at the vanguard of this transition. The company has already introduced production-ready electric highloaders, marking a significant milestone in sustainable airport operations. By prioritizing

“Our systems are built to protect both operators and equipment, ensuring that approaching an aircraft is always safe,” explains Mr Ramella. “With minimal training required, our solutions are ideal for environments where staff turnover is high.”

eco-friendly innovations, DOLL not only meets regulatory demands but also helps airports reduce their environmental footprint—a critical advantage in an era of heightened climate consciousness.

Airport management is fraught with complexities, from high staff turnover to the critical need for error-free operations near aircraft. DOLL tackles these challenges head-on with intuitive, safety-driven systems designed to prevent accidents—even when human error occurs.

“Our systems are built to protect both operators and equipment, ensuring that approaching an aircraft is always safe,” explains Mr Ramella. “With minimal training required, our solutions are ideal for environments where staff turnover is high.”

DOLL’s solutions are trusted at over 260 airports across 80 countries. While Europe remains its primary market, the company is expanding its footprint in North America and the Middle East. “We take pride in seeing our highloaders in action at airports worldwide,” says Mr. Ramella, a key asset at DOLL.

Looking to the future, DOLL is poised for continued growth, with a strategic focus on Europe, North America, and the Middle East. The company’s vision is clear: to maintain its innovation leadership while expanding its portfolio of electric and smart solutions. By forging key alliances and staying attuned to industry trends, DOLL aims to further solidify its position as the go-to partner for airport management services.

DOLL’s journey from a niche equipment provider to a global powerhouse is a story of vision, perseverance, and technological brilliance. By addressing the aviation industry’s most pressing challenges with innovative, sustainable, and safety-centric solutions, DOLL is not just keeping pace with the times—it’s shaping the future of airport management. For airports seeking a partner that combines quality, innovation, and unwavering support, DOLL stands as the clear choice.

DOLL’s story is one of transformation, driven by a passion for excellence and a commitment to redefining what’s possible in airport management. As the industry evolves, DOLL remains steadfast in its mission to deliver solutions that are as reliable as they are revolutionary
